BRAND HEALTH ASSESSMENT

BetterUp | betterup.com | February 2026

Industry	Revenue (2024)	Assessment Type
B2B Enterprise HR Tech / AI Coaching	~$214.6M ARR	Moment-in-Time Snapshot

Overall Brand Health Index

Calculated across 10 dimensions using B2B weighting model

Trend Alert: Revenue declined ~14% YoY in 2024. Employee brand and internal sentiment are significant drags. AI product pivot in 2025 is the clearest positive momentum signal.

54

out of 100

MODERATE

Declining Trend

1. Executive Summary

BetterUp enters 2026 as the clear category pioneer in B2B digital coaching. With $214.6M in revenue, a Fortune 1000 client base including Microsoft, Salesforce, Google, and Hilton, and the largest behavioral dataset on professional development in the world, the brand has genuine assets to build on. But several converging challenges are suppressing brand health scores and creating compounding risk over the next 12-24 months.

Top 3 brand strengths	Top 3 brand vulnerabilities
Category Authority BetterUp invented the digital coaching category and is still referenced as the default name in analyst reports, HR tech comparisons, and competitor SEO strategies.	**Internal Brand Crisis** Glassdoor rating of 3.2/5 from 479 reviews with consistent leadership criticism. The values-vs-reality gap is now a public brand liability.
AI Product Momentum The Jan 2025 launch of BetterUp Grow (AI coaching) and acquisitions of Practica and Heyday represent the strongest forward brand signal in two years	**Pricing Opacity** Opaque enterprise pricing and $499+/user/month estimates create buyer friction and fuel 'expensive' as a dominant brand attribute.

Client Logos and Data Moat	Revenue Decline Signal
Fortune 1000 clients and 17M behavioral data points create a proof-of-performance moat that competitors cannot easily replicate.	A ~14% YoY revenue decline in 2024 contradicts brand claims of scale and momentum, and surfaces as a trust signal for prospective enterprise buyers.

#1 Priority Action

Urgently close the values-reality gap. The brand's core promise of human transformation and psychological safety is being directly undermined by documented employee experience. This is a credibility problem that will increasingly affect enterprise sales cycles as CHROs do due diligence on BetterUp as a vendor.

2. Brand Profile

Founded	2013, San Francisco CA (now Austin TX)
Category	B2B Enterprise AI + Human Coaching / Human Transformation Platform
Core Positioning	The Human Transformation Platform - AI + behavioral science + human coaching to drive enterprise workforce performance
Primary Buyer	CHRO, CLO, VP of Talent/L&D at enterprise organizations (1,000+ employees)
Notable Clients	Microsoft, Salesforce, Google, Hilton, SpaceX, Adobe, Mayo Clinic, Chevron, NASA
Key Partnerships	Microsoft Viva/Teams, Workday, Slack, Salesforce Ventures (investor + customer)
Recent Strategic Moves	B2C exit; acquisitions of Practica (AI coaching) and Heyday (coach tools); launched BetterUp Grow AI product Jan 2025; Brene Brown partnership announced 2025

3. Competitive Landscape

Top 3 competitors ranked by estimated revenue. BetterUp holds a significant revenue lead; competitive threat is primarily on product differentiation and pricing as AI commoditizes core coaching features.

Competitor	Est. Revenue	Funding	Key Differentiation
CoachHub	~$231M (2024 est.)	$333.5M raised	Strongest European footprint; enterprise analytics; multilingual (70+ languages); primary global challenger

Torch	~$30-50M (est.)	$87.8M raised	Leadership development focus; G2 High Performer; highest Glassdoor ratings in category -- key differentiator vs. BetterUp
Ezra (LHH)	~$50-80M (est.)	LHH / Adecco Group	Unlimited coaching model; strong Deloitte/Vodafone enterprise relationships; aggressive on pricing transparency

4. Dimension Scorecards

4.1 Brand Awareness

Brand Awareness *Strong category recognition; clear search leader; Microsoft partnership amplifies reach*	**72/100** **STRONG**

BetterUp is the most recognized name in enterprise digital coaching. It consistently ranks first in branded search volume within its category, appears as the default benchmark in competitor SEO strategies, and is routinely cited by analysts including Josh Bersin as the category leader. The Microsoft Viva integration materially expands passive awareness among enterprise HR buyers.

Awareness Strengths

- Category inventor -- owns the origin story of digital coaching
- Top-of-mind recall with CHRO/CLO buyer personas
- Microsoft, Workday, Slack integrations = passive enterprise awareness at scale
- Analyst recognition (Josh Bersin, Training Industry) drives B2B decision-maker awareness
- BetterUp Uplift annual conference = owned media awareness engine

Awareness Gaps

- Awareness does not translate to consideration -- pricing opacity creates drop-off
- International awareness lags CoachHub significantly, especially EMEA
- Mid-market and SMB awareness nearly zero after B2C exit
- New product lines (Manage, Grow, Ready) have low independent awareness

4.2 Brand Perception & Attributes

Brand Perception *Strong on science/quality; weak on value, transparency, and execution delivery*	**55/100** **MODERATE**

External buyers associate BetterUp with scientific credibility, premium quality, and enterprise scale. However, a growing cluster of negative perception points are accumulating around pricing opacity, internal inconsistency, and concerns about whether the product delivers ROI at the claimed price point.

Positive Attribute Cluster	Negative Attribute Cluster
• Science-backed / evidence-based • Premium quality coaches • Pioneer / category creator • Enterprise-grade / Fortune 500 trusted • Innovative (AI pivot receiving positive press)	• Expensive / opaque pricing • Values-reality gap (preaches transformation, fires people awkwardly) • Over-hyped / style over substance • Prince Harry association = polarizing, distracting • Hard to reach / poor customer service (individual tier)

Positioning Gap Alert

BetterUp claims 'human transformation' but is increasingly perceived as a premium coaching subscription with inconsistent delivery. The category doesn't appear to be gaining traction from an awareness standpoint.

4.3 Customer Experience

Customer Experience	58/100 MODERATE
End-user experience is strong; enterprise buyer/admin experience has clear friction points	

The experience diverges sharply by customer type. Individual coachees who are successfully matched with a coach report highly positive outcomes. Enterprise HR buyers and administrators report friction around account management turnover, ROI measurement complexity, and pricing negotiation opacity.

CX Strengths

- Coach quality rated #1 positive across all review platforms
- Matching algorithm generally praised for relevance
- Platform UX rated as clean and easy to navigate
- BetterUp Grow (AI coach) reporting 95% early satisfaction
- Slack/Teams integration reduces friction for enterprise end users

CX Pain Points

- High account manager turnover -- clients report 3+ AMs in 12 months
- Individual tier: punitive credit expiry (30-day), described as 'predatory'
- Support responsiveness poor for coaches and individual users
- Pricing feels opaque; ROI demonstration complex for budget owners
- Coach supply inconsistency reported by coaches and some members in 2025

4.4 Share of Voice

Share of Voice *Leads category in raw mentions; context quality is mixed*	**67/100** **MODERATE**

BetterUp commands the highest share of voice in the enterprise coaching category. However, a meaningful portion of recent SOV is driven by negative media narratives (layoffs, Prince Harry, leadership criticism) rather than product leadership stories, which dilutes the value of the volume advantage.

- Positive 2025 earned media: AI product launches (Jan, Jul, Oct 2025), BetterUp MCP Server (Oct 2025), Workday partnership expansion (Dec 2024), Uplift 2025 NYC, Mercedes-AMG F1 partnership, Brene Brown Center for Daring Leadership.
- Uplift 2026 (Apr 15-16 SF) already announced with Shonda Rhimes, Adam Grant, Brene Brown, Dr. Becky Kennedy as headliners -- forward SOV signal.
- Competitor SEO: BetterUp is the default name all rivals benchmark against in comparison pages -- inherent but double-edged.
- Review sites: Glassdoor reviews (now 688+) appear in top results for brand searches -- employee sentiment is visible front-page SOV.

4.5 Customer Loyalty & Retention

Customer Loyalty *Enterprise retention appears solid; individual tier churn is high; coach community loyalty declining*	**60/100** **MODERATE**

Enterprise retention signals are strong -- BetterUp's 2021 NRR of 170% is the strongest loyalty signal in the dataset, and client tenure indicators from case studies suggest Fortune 500 accounts are multi-year. The weaker signals are in the individual and coach populations, where pricing changes and communication gaps are generating increasing dissatisfaction.

4.6 Likelihood to Recommend (NPS Proxy)

NPS Proxy *Enterprise users likely recommend; individual and coach populations are net detractors*	**56/100** **MODERATE**

Analysis of review language across G2, Trustpilot, Glassdoor, and Indeed reveals a bifurcated promoter landscape. Enterprise coachees through employer-sponsored programs are highly likely to recommend -- language like 'invaluable' and 'I've recommended to my whole team' appears consistently. Individual

subscribers and coaches are generating increasing detractor language around value, fairness, and communication.

4.7 Brand Consistency Across Touchpoints

Brand Consistency *Website is strong; significant inconsistency between external brand promise and internal reality*	**52/100** **MODERATE**

BetterUp's visual and messaging identity is coherent across primary digital touchpoints. The deep inconsistency problem is not visual but substantive: the brand promises a culture of psychological safety and transformation, while its Glassdoor profile documents the opposite. When enterprise buyers conduct vendor diligence, this inconsistency is immediately visible.

Touchpoint	Assessment	Consistency Score	Priority
Website	Polished, on-brand, strong enterprise focus. Clear product architecture.	88/100	Low
LinkedIn (Company)	Active, consistent tone, good thought leadership cadence.	80/100	Low
Press / PR	Positive AI product stories; negative layoff/Harry coverage persists in search.	60/100	Medium
Glassdoor Profile	Severe misalignment with brand values. Dominates 'BetterUp culture' search results.	24/100	Critical
Trustpilot / Reviews	Individual tier experiences contradict the 'transformation' promise for consumer users.	38/100	High
Job Postings	Culture language in JDs inconsistent with Glassdoor reality; creates candidate distrust.	42/100	High
Coach Community	Communication gaps and pay disputes create inconsistency in the most visible human touchpoint.	40/100	High

4.8 Employee Brand Health

Employee Brand Health *Critical -- the single most urgent brand health issue*	**32/100** **VULNERABLE**

This is the most significant brand vulnerability in the assessment. BetterUp scores a 3.2/5 on Glassdoor from 479 reviews -- below the industry average of 3.9 for IT companies. The pattern of criticism is

structurally consistent and deeply ironic: a company selling human transformation and psychological safety is documented by its own employees as practicing neither.

> **The “Ack” Paradox**
> Glassdoor reviews describe leadership using coaching jargon as pressure tactics ('shift your mindset,' 'practice imagination') to avoid accountability -- the exact weaponization of psychological safety that BetterUp's coaches are trained to prevent in client organizations. This is not just an HR problem. It is a brand integrity crisis.

Key themes from employee reviews (multiple sources, cross-validated):

- CEO/COO leadership cited as primary negative factor by strong majority of critical reviews
- 'Values vs. reality' is the most frequent specific complaint -- the irony of BetterUp not practicing what it coaches is repeatedly noted
- Multiple rounds of layoffs handled in ways described as inconsistent with stated values
- High senior leader turnover -- 'more than a dozen leaders departed in the past year' cited in multiple recent reviews
- Sales team: 4-5 reorganizations in recent years, impossible quotas, zero sales enablement
- Coach community: Pay disputes, declining work volume, lack of communication -- coaches are the most visible human representation of the brand

> **Why This Is a B2B Sales Problem**
> Enterprise CHROs purchasing BetterUp are often doing so to improve employee experience, leadership culture, and psychological safety. Before signing a $499+/user contract, many will conduct vendor diligence. A Google search for 'BetterUp culture' currently returns prominently negative Glassdoor content as one of the top results. This is a material deal-blocker.

4.9 Cultural & Contextual Relevance

Cultural & Contextual Relevance *AI pivot is well-timed; some relevance risks in B2C-to-B2B transition and DEI headwinds*	**62/100** **MODERATE**

BetterUp's January 2025 AI coaching launch positions it well in the dominant category conversation of 2025-2026: how enterprises deploy AI in the flow of work. The 'Human + AI' framing is culturally resonant with HR leaders navigating workforce AI transformation. The Brene Brown partnership adds cultural credibility with the leadership development audience.

Relevance Strengths

- 'AI coaching at scale' is the defining HR tech conversation of 2025-2026 -- BetterUp is actively in that conversation
- Leadership resilience narratives align with macroeconomic uncertainty themes buyers care about
- Government sector expansion ahead of all major competitors
- Brene Brown partnership adds cultural currency with next-gen leadership development audience

Relevance Risks

- B2C exit removes BetterUp from consumer wellness cultural conversation entirely
- DEI coaching faces corporate budget headwinds in 2025-2026 political climate
- “Human transformation' language increasingly contested -- skeptical buyers see it as jargon
- Prince Harry association remains a cultural polarizer with no current resolution signal

4.10 Brand Vulnerabilities & Future Threats

Vulnerability Index *Multiple active vulnerabilities; one near-term existential threat*	**41/100** **VULNERABLE**

Current Active Vulnerabilities

- Values-integrity gap: The documented contradiction between brand promise and employee experience is the highest-urgency vulnerability. It is public, searchable, and directly relevant to enterprise buyers.
- Revenue decline narrative: A 14% YoY decline in 2024 creates a 'is this company stable?' question for enterprise procurement.
- Pricing opacity: No public pricing, estimated at $499+/user/month enterprise, creates friction in self-directed buyer research.
- Coach community erosion: Coaches are BetterUp's product. Declining satisfaction and pay disputes are a direct product quality risk.
- Account manager churn: Clients experiencing 3+ AMs in 12 months drives non-renewal and generates negative word-of-mouth in the CHRO community.

Future Threat Signals

- AI commoditization: Microsoft Copilot, Salesforce Einstein, and Workday AI are building adjacent coaching capabilities. BetterUp's moat narrows as foundational AI becomes ubiquitous.
- Founder/CEO brand risk: Multiple reviews specifically name CEO as the root cause of cultural dysfunction. If this reaches mainstream enterprise press, it becomes a sales cycle liability.
- Valuation overhang: $5B valuation on $215M declining revenue creates investor pressure that could force pivots, additional layoffs, or an unfavorable acquisition -- all generating negative brand coverage.
- Category entrants with AI-native architectures: New entrants building AI coaching platforms from scratch may offer comparable outcomes at lower price points within 18-24 months.

- LLM coaching substitution: Buyers may increasingly view ChatGPT/Claude/Gemini as 'good enough' for lower-stakes development needs, compressing BetterUp's market upward toward high-stakes executive use cases only.

5. Competitive Benchmark

Side-by-side dimension comparison. Scores are AI-derived assessments based on available public signals; not independently audited.

Dimension	BetterUp	CoachHub	Torch	Ezra
Brand Awareness	72	58	42	38
Brand Perception	55	62	68	55
Customer Experience	58	65	72	60
Share of Voice	67	48	30	25
Customer Loyalty	60	64	70	58
NPS Proxy	56	60	74	62
Brand Consistency	52	65	78	60
Employee Brand Health	32	55	82	50
Cultural Relevance	62	58	60	55
Vulnerability Index	41	55	72	60
OVERALL BHI (B2B wt.)	54	59	65	54

Key Competitive Insight

Torch's 82/100 Employee Brand Health score versus BetterUp's 32/100 is the most actionable competitive gap in this table. Torch is actively using its Glassdoor rating as a marketing differentiator. BetterUp is currently losing at a dimension its entire product proposition depends on being credible.

6. Brand Opportunities

- Own the 'Responsible AI in the Workplace' conversation. BetterUp's safety-first AI development philosophy (4+ years to develop BetterUp Grow responsibly) is a genuine differentiator. This story is underdeveloped.
- Capture the government sector. BetterUp Ready's government vertical is ahead of all major competitors and in a market with significant budget and relatively low competitive intensity.
- Become the definitive enterprise benchmark for coaching ROI. BetterUp has the largest professional development outcomes dataset in the world. A published, transparent ROI methodology would reduce pricing friction and create a defensible moat.

- Turn the coach community into brand advocates. A well-treated coach network of 5,000+ professionals is a massive organic B2B awareness engine. Currently a vulnerability; could become a strength.
- MCP ecosystem play. The BetterUp MCP Server (Oct 2025, currently Claude-connected; ChatGPT and Copilot planned) positions BetterUp as the first coaching platform to embed into AI assistants natively -- a category-defining distribution advantage if executed at scale before competitors react.
- Fill the mid-market gap left by B2C exit. A mid-market segment (500-2,000 employee companies) with coaching budget is underserved. A productized, lower-friction offering could capture this before CoachHub or Torch does.

7. Top Recommendations

Prioritized by impact/effort matrix. High = critical path items. Medium = important but can follow high-priority actions. Low = tactical fills worth doing if capacity allows.

#	Priority	Dimension	Recommendation	Impact	Effort
1	HIGH	*Employee Brand*	**Launch a public 'Walking Our Talk' initiative** Create a visible, externally communicated commitment to apply BetterUp's own coaching methodology internally. Include measurable commitments (e.g., 'Our Glassdoor score will reach X by Q4 2026'). This requires operational change first, not PR.	Closes the most damaging brand gap; reduces enterprise deal-blocker; creates authentic content	High
2	HIGH	*Customer Experience*	**Fix account manager continuity for enterprise clients** Implement a formal client continuity program: no client should experience more than 1 AM transition per 12 months without a proactive onboarding protocol. Current churn is actively generating negative word-of-mouth in the CHRO community.	Direct retention improvement; generates positive referral language	Medium
3	HIGH	*Brand Perception*	**Replace 'human transformation' jargon with outcome language** Audit all key messaging for abstraction and replace with specific, measurable outcomes. 'Your managers will retain top talent longer' outperforms 'human transformation at scale' in enterprise procurement conversations.	Reduces positioning gap; improves B2B consideration rate	Low

4	**HIGH**	*Employee Brand*	**Engage the coach community with a formal advocacy program** Coaches are BetterUp's most credible external voices. A structured coach ambassador program -- with fair compensation, communication transparency, and platform governance input -- converts a current detractor population into brand advocates.	Improves product quality, coach supply, and earned SOV simultaneously	Medium
5	**MEDIUM**	*Brand Perception*	**Publish a transparent ROI calculator and pricing framework** Remove pricing opacity as a sales friction point. Even if exact pricing varies, a published 'starting from' range and a public ROI methodology reduces the 'expensive and opaque' perception and enables self-directed buyer research.	Improves consideration rate; reduces sales cycle length	Low
6	**MEDIUM**	*Cultural Relevance*	**Build an 'Ethical AI in Coaching' thought leadership position** BetterUp spent 4+ years developing AI responsibly. Publish detailed documentation of safety protocols, bias testing, and privacy architecture. Position BetterUp as the trusted enterprise AI coaching provider -- not just the first.	Differentiates from AI-native competitors; earns analyst coverage	Medium
7	**MEDIUM**	*Share of Voice*	**Neutralize Prince Harry association strategically** Without a public or dramatic separation, allow the association to quietly diminish by deprioritizing references, refocusing PR on product and science stories, and elevating new brand ambassadors (Brene Brown partnership is a positive step).	Removes a polarizing element from enterprise B2B brand narrative	Low
8	**MEDIUM**	*Brand Consistency*	**Invest in a Glassdoor response and reputation program** Assign a dedicated team to respond to every Glassdoor review thoughtfully (not defensively). Work with HR to address the top 5 most-cited complaints with concrete, visible changes. Goal: a 0.5-point rating improvement within 12 months.	Reduces enterprise deal-blocker; demonstrates brand integrity	Medium
9	**LOW**	*Brand Awareness*	**Develop a mid-market productized offer** Create a streamlined, lower-touch BetterUp offering for companies with 500-2,000 employees with transparent pricing. Captures a segment currently underserved after B2C exit, without cannibalizing enterprise.	Expands TAM; generates new category SOV	High

10	**LOW**	*Cultural Relevance*	**Commission an annual State of Human Transformation benchmark report** Leverage the 17M data point advantage to publish a credible annual industry benchmark -- something no competitor can replicate. Would generate earned media, analyst engagement, and CHRO mindshare.	Sustains thought leadership; creates repeatable content engine	Medium

8. How Pinwheel Can Help

Based on the brand health findings and the priority recommendations above, the following Pinwheel services directly address BetterUp's highest-leverage opportunities.

Brand Health Finding	Priority Recommendation	Pinwheel Service
Positioning gap: 'Human transformation' jargon is losing credibility with enterprise buyers	Replace abstraction with outcome-driven messaging (Rec #3)	**Brand Strategy & Messaging: Clarify your brand story narrative and positioning to win the category**
Values-reality gap is the #1 brand liability. Employees and coaches describe a disconnect between brand promise and lived experience	Launch 'Walking Our Talk' initiative with visible internal commitments (Rec #1)	**Brand Strategy & Messaging: Reframe the internal and external narrative around authentic transformation**
BetterUp has the largest professional development dataset in the world -- largely an untold story	Commission annual State of Human Transformation benchmark report (Rec #10)	**Thought Leadership Content: Build industry authority and executive credibility through blog writing and research-driven content**
Category authority is strong but AI pivot story is underdeveloped externally	Build 'Ethical AI in Coaching' thought leadership position (Rec #6)	**Thought Leadership Content: Establish BetterUp as the trusted enterprise AI coaching authority -- not just the first mover**
Pricing opacity creates self-directed buyer friction; 'expensive' is a dominant perceived attribute	Publish transparent ROI calculator and pricing framework (Rec #5)	**Campaign Development & SEO/AEO: Drive conversions and trust with search-optimized ROI content and comparison pages**
Account manager churn means enterprise clients disengage before understanding full product value	Fix client continuity and build a unified post-sale story (Rec #2)	**Sales Enablement Materials: Equip sales and leadership with a unified, data-backed story to shorten cycles and reduce churn**
Coach community and employee advocates are an untapped organic awareness channel	Launch formal coach advocacy program (Rec #4)	**Messaging & Sales Enablement: Give advocates the language, assets, and frameworks to tell the BetterUp story consistently**
Mid-market segment is unserved after B2C exit; new buyer personas need new entry points	Develop a mid-market productized offer with ABM support (Rec #9)	**ABM Programs & Email Campaigns: Shorten sales cycles and increase high-intent pipeline with targeted mid-market ABM**

Complex platform story (Lead, Manage, Ready, Grow) is hard for buyers to navigate without a visual framework	Create visual coherence across product lines and sales materials	**Design & Visual Identity Systems: Create visual coherence that accelerates brand recognition, trust, and retention**
Brand narrative is text-heavy; competitive differentiation is hard to communicate quickly in sales cycles	Turn the behavioral science proof points into persuasive, shareable narratives	**Video & Animation: Turn complex ideas into persuasive, shareable narratives for sales, marketing, and executive storytelling**

Pinwheel Services Summary

Based on this assessment, the highest-leverage Pinwheel engagements for BetterUp are:

- Brand Strategy & Messaging -- reframe the brand from the inside out, closing the values-reality gap and replacing jargon with outcome language
- Thought Leadership Content -- monetize the 17M data point moat with research-driven content that builds category authority and earns analyst coverage
- Sales Enablement Materials -- give AEs, AMs, and advocates the tools to tell a unified, credible story in a skeptical buying environment
- SEO/AEO & Campaign Development -- capture self-directed enterprise buyers who are currently hitting a wall of opacity when researching BetterUp
- Design & Visual Identity -- bring coherence to a multi-product platform story that is currently difficult for buyers to navigate quickly

9. Data Sources & Confidence Notes

This assessment applies a two-tier recency model: Primary sources must be within 12 months of the assessment date (Feb 2026); Reference sources may extend to 24 months for historical context. All sources are listed with their date range below.

Source	What It Informed	Confidence	Source Date Range
Glassdoor (688+ reviews)	Employee brand health, cultural perception, leadership	High	**Jan 2025–Jan 2026 ✓ Primary**
Trustpilot / Review sites	Individual customer experience, NPS proxy	Medium	**2025 ✓ Primary**
G2, TrustRadius	Enterprise satisfaction, product attributes	Medium (low volume)	**2025 ✓ Primary**
Indeed (coach reviews)	Coach community health, product delivery quality	High	**2025 ✓ Primary**
BetterUp website & press room	Positioning, product launches, partnerships, messaging	High	**Jan–Oct 2025 ✓ Primary**
LinkedIn company page	Brand consistency, SOV, thought leadership cadence	High	**Feb 2026 ✓ Primary**

Press & analyst coverage	Brand awareness, competitive narrative, PR signals	High	**2025–Feb 2026 ✓ Primary**
Competitor websites & G2	Competitive differentiation, pricing signals, Glassdoor ratings	High	**2025 ✓ Primary**
Tracxn company profile	Headcount, competitor landscape, recent events	High	**Feb 2026 ✓ Primary**
Revenue data (Sacra, Latka, Crunchbase)	Market position, financial trajectory	Medium (estimates)	**2024 — Reference (BetterUp does not publicly report)**

> **Data Confidence & Recency Note**
> 9 of 10 source categories are Primary (within 12 months). Revenue/financial data is the only Reference-tier source, as BetterUp does not publicly report financials. Glassdoor volume has grown from 479 to 688+ reviews since the prior assessment run, with the most recent entries dated January 2026 — confirming that key employee sentiment findings are current, not historical. NPS proxy and loyalty scores are inferred from review language, not primary survey data.

Scores are AI-derived assessments based on publicly available data. Not independently audited.
